ong, Straightforward Advice to Thin,

If you are thin, scrawny and undaveloped, if your face is peaked and your cheeks and neek gathibit unsightly hollows, it's almost certain that your nervous system is at the bottom of the trouble. You can eat three, yes, feur, substantial, fat producting meals a day, but as long as your stomech has an insufficient supply of nerve force this food you sat will neas out of the body with little if any benefit.

can will pass out of the body with little
if any benefit.

In order to assimilate properly the
neurishing food you eat and convert it
into healthy tissue and fat, the nerves
that control the process of direction and
assimilation must be put in first class
shape, and until that is done you might
just as well quit trying to put on fiesh.
Your system is starving for something
that will turn the food you eat into
healthy stay-there fiesh and it can only
be done in one way—by correcting faulty
nervous digestion.

Thin, nervous, run-down people, howsver, with impoverished blood and halfstarved looks are halling with delight a
quick and cartain maker of solid fiesh
called EVANS TRIPLE PHOSPHATES
that is unequalled for renairing faulty
ligestion and correcting nervous digestive
troubles. In fact, the makers of Evans'
Triple Phosphates guarantee that one
month's treatment will increase your
weight by several pounds and within ten
days make you feel like a new being, full
of ambition, vigor and a desire to accomplish things. Les & Osgood and leading
iruggists everywhere have agreed to
supply Evans' Triple Phosphates and
guarantee it to do just what is claimed
for it or money refunded.

Caption: While Evans' Triple Phosphates accommilahes wonders in nervous
digestive troubles and as a general nervo
tonic, it should not be taken by anyone
who objects to a few additional pounds
of solid stay-there fiesh.
